

Campus Site Plan  
developed in 2001 by  
WEGROUP

This plan reflects KCC  
modifications to the 2001  
campus site plan,  
including elimination of  
the central East  
entrance at Highway  
140 and Highway 39.

The campus site plan  
reflects a single-story,  
200,000 SF building.

The community  
meetings concluded that  
a two-story building  
may be more  
appropriate. It may also  
be desirable to reorient  
the building East-West  
to provide greater  
daylighting capabilities  
and reduce thermal gain  
from West facing glass.
